

We are supposed to be comparing Hosting plans here, but it is difficult when the “competition does not even get close to a feasible package!

You have a reseller hosting account control panel called Web Host Manager. WHM is where you go to create your customer accounts. After filling in their account information you click "create." This will instantly set them up with their very own control panel called c Panel. This is where they will go to administer their website. Once they are logged into c Panel they can create subdomains, email addresses, change passwords, and much more without requiring any help from you or us.

Go to the site below and click on Reseller plans! Also you can be an affiliate and receive \$50.00 for ever individual plan you sell, even if it is a \$4.95 a month !!
